INTRODUCTION

Earning money while playing online games is definitely an exciting and fun way to earn - whether you're a "gamer" or not. I'm not talking about playing online poker or bingo where you play based on chance or luck. I'm talking about exciting and challenging **MMORPG** games (or multi-massive online role playing games) where you can use/develop your game skills to plan and strategize in order to accumulate earnings.

Many years ago, the only way to earn from MMORPG is to sell or trade game accounts (or items) which is usually done outside of the game venue. It works something like this... you join an online game (ex. Ragnarok, WOW, etc.), play actively and buy credits (e.g. game cards/experience points/etc.) to level up your game character and sell your account to another player for profit.

It's not as easy as it seems (except if you really love playing) because the amount of time and money that you put in may or may not be compensated when you sell your account. AND normally this practice is against certain "Terms of Service" (TOS) of some games - so your account can also get banned for involving yourself in these activities.

However, today and in the last 5 years or so, there are online games that offer real cash earnings to participating players. Online games where virtual earnings can be converted into real money and can be withdrawn via Paypal (or even as Bitcoins).

The purpose of this e-book?

- 1) To present to you these legit "get paid to play " online games - All free to join and participate;
- 2) To show you which games to play to earn good money;
- 3) Teach how to maximize your game earnings; and
- 4) To share other income opportunities related to games.

HOW TO GET STARTED

You only need three online accounts to get you started and all are free to register...

1. Gmail Email Account:

You will need a valid email address (preferably a Gmail) before you can register for a free PayPal account. You will be needing it also when you register with online game sites. Most websites that offer income opportunity programs prefer Gmail more than Yahoo or Hotmail. You can use this email exclusively for all your online earning-related activities.

Click **HERE** to open your free Gmail account.

2. PayPal Account:

After opening your Gmail account >> Register your free Paypal account. Paypal offers online payment processing services - with no initial deposit and no maintaining balance required (unlike regular banks). Also, majority of websites that offer income opportunity programs prefer to pay via Paypal.

Click **HERE** to register your free Paypal account.

3. Bitcoin Wallet Account:

After opening your Paypal account >> Create your free Bitcoin Wallet account at Blockchain.info. You must have a Bitcoin Wallet to receive your online game earnings in Bitcoins. Not yet familiar with Bitcoins? Click **here** to watch a simple presentation about Bitcoin basics.

Click **HERE** to register your free Blockchain Bitcoin Wallet account.
And **HERE** if you're based in the Philippines (Coins.ph Wallet).

THREE WAYS TO MAXIMIZE YOUR ONLINE GAME EARNINGS

How to earn faster in the game (3 Options):

1. **Invest money** and be active in the game (be active means >> **play it daily!**)
2. **Invest time referring new players** and be active in the game. Or
3. **Do both** and be active in the game.

The only sure way to earn (and learn) faster is to play the game regularly – that’s why in all the three options – being active in the game is always included. You have to be patient because like in any other games - it will be slow at the beginning since you are just starting out and still learning how the game works.

Also, just like in any regular games – excitement starts to build up when you have attained a certain game level. And when you have acquired certain skills & knowledge that will enable you to plan and strategize your next game moves.

“The best way to learn more about the game is to actively play it.”

Again, there is no “one way” to play these games. It will depend on your game knowledge and your preferences. Some players earn more thru fighting and conquering while others prefer to grow their businesses or increase their production.

Needless to say, learning how the game works is very important. You can learn from available game site documentation and you can also learn from other players’ actual experiences thru the chat and forum provided in the games. Resourcefulness and initiative are two things that you need to keep in mind while playing the game.

MAXIMIZING YOUR ONLINE GAME EARNINGS

(Continuation...)

OPTION #1. INVEST MONEY

Investing money is only an option if you want to develop and earn faster in the game. In **Golden Towns**, the minimum recommended amount to invest is around **4 Euro** (the amount of 2 gold) - this is equivalent to around US\$ 5.00. You need gold to buy energy, to buy resources, to hire workers, and to finish a building process instantly. In short, you need gold to develop your town faster.

While in **Market Glory**, the minimum recommended amount to invest is **20 Euro** (the amount of 100 XP or experience points) – this is equivalent to around US\$25.00. If you have higher XP you will receive higher wages and higher work bonuses. This will help you earn faster hence will also help you to start setting-up your first business earlier/faster.

Note: You can transfer Euro from your Market Glory to your Goal Tycoon account and vice versa. So you have the option to use your Market Glory money to pay for Goal Tycoon expenses (i.e. upgrading buildings, trading players, etc.).

OPTION #2. INVEST TIME – TO REFER NEW PLAYERS

Referring new players is another way to earn faster in the game because you can receive certain bonuses for having referrals. However, you will only benefit from this option if you have active referrals.

Inviting new players is really not that hard – these are fun intelligent games after all and who wouldn't want to earn while playing games right? =)

One proven way to have active referrals is thru game education. Take time to provide guides/tutorials to help them get started. Share tips and tricks based on your game experiences.

You can set-up a free Blogger blog, create tutorial posts and share your blog to your referrals. (Click [here](#) to download a free guide on how to create a Blogger blog). **OR** you can simply create a tutorial using MS word and give it away to anyone who signed up as your referral (send it via email or FB).

OPTION #3. DO BOTH – INVEST MONEY & TIME TO REFER NEW PLAYERS
